

Red & White Services Fleet List 1930-1975

2. Coaches

2.5 1936-38 Albion Valkyrie PV141

The PV141 and SpPV141 Valkyries appeared in 1936 with the Sp versions having 5LW and 6LW Gardner oil engines respectively. They were in production until mid-1938. Red & White purchased 22 SpPV141s with Duple C32F coach bodywork, 17 for the main fleet and 5 for the Liberty Motors operation. Nine more were allocated to the Swansea area companies. Although all bodies were Duple C32F there were differences in style between the 1936, 1937 and 1938 models. A further three SpPV141s with Duple observation coachwork were acquired with the Blue Belle business in 1939 and were later rebodied.
